Subject: RE: THE Investigation Report

The Sheriff is concerned with KCAC because her contract cities are contacting her explaining that KCAC isn't providing any service, and they don't understand. We dispatch for them and they don't pay us for the service. She was very interested in taking on the investigations, but felt the council would not provide her with the monies to add the FTEs. She was clearly not willing to take on the fight with the council herself as she has many other things that she is handling that requires her attention.

That said, if the council approves commissioned officers taking over the investigation, AND they add the FTEs she would clearly be willing to openly discuss the matter.
